## Certificate of Compliance

Certificate: 2615594
Project:
2631365
Issued to: Max-Air Technology, Inc.
751 Hoff Rd
O'Fallon, MO 63366
USA
Attention: Jon Davis

Mark shown with adjacent indicators ' $C^{\prime}$ 'and 'US' for Canada and US or with adjacent indicator 'US' for US only or without either indicator for Canada only.

Marius Manastíreanu
Issued by: Marius Manastireanu

PRODUCTS
CLASS 225882 - PROCESS CONTROL EQUIPMENT - For Hazardous Locations Certified to US Standards
CLASS 225802 - PROCESS CONTROL EQUIPMENT - For Hazardous Locations

Class I, Division 1, Groups C and D; Class II, Division 1, Groups E, F and G; Class III; Temp Code T4A
Ex d IIB T5 Gb; Ex tb IIIC T108 ${ }^{\circ}$ C Db

## Notes:

1) Electrical ratings for this application are dictated by the limiting internal switch with the lowest electrical ratings.
2) Wiring to or from this device, which enters or leaves the system enclosure, must utilize wiring methods suitable for Class I Division 1, respectively Class 1 Division 2 Hazardous Locations, as appropriate for the installation.
3) Enclosure Environmental ratings are achieved when conduit entries are torqued to at least $90.4 \mathrm{Nm}(800 \mathrm{lbs} /$ inch) and fasteners (Class A2-50) to 40 Nm ( $354 \mathrm{lbs} / \mathrm{inch}$ ) not-lubricated conditions.

## MARKINGS

Markings appear on a minimum 0.02 inch thick aluminum or stainless steel nameplate, secured to the outside of the enclosure using non-removable fasteners in blind holes. The following marking details can be stamped, etched, silkscreened, molded or embossed on the nameplate:

## Certificate: 2615594

Project:
2631365

Master Contract: 218481
Date Issued:
June 10, 2013

- Manufacturer Name: "Max-Air Technologies", or CSA Master Contract Number"218481", adjacent to the CSA Mark in lieu of manufacturer's name
- Model number: As specified in the PRODUCTS section above.
- Electrical Ratings: As specified in the PRODUCTS section above.
- Ambient temperature rating: As specified in the PRODUCTS section above.
- Manufacturer date in MMYY format, or serial number, traceable to month of manufacture.
- Enclosure ratings: As specified in the PRODUCTS section above.
- The CSA Mark with or without "C" and "US" indicators, as shown on the Certificate of Conformity.
- Hazardous Locations designations: As specified in the PRODUCTS section above.
- Temperature code: As specified in the PRODUCTS section above, optional marking
- Terminal Designations adjacent to each field wiring terminal
- The ground designation "GND" or equivalent adjacent to the equipment terminal
- The following words for "Class I, Division 1, Group C and D" marked equipment:
- "Open circuit before removing cover", or "Keep cover tight while circuits are alive" or equivalent.
-"Seal required within 18 inches" or equivalent
- The following words for "Class I, Division 2, Group A, B, C and D" marked equipment:
- "WARNING - EXPLOSION HAZARD - Substitution of components may impair suitability for Class I, Division 2" or equivalent
- "WARNING - EXPLOSION HAZARD - Do not connect while circuit is alive unless area is known to be nonhazardous" or equivalent

An installation manual or data sheet shall be supplied with each unit, containing the following minimum marking information:

- Manufacturer's name and address
- Electrical ratings, ambient temperature rating and enclosure ratings as described in the PRODUCTS section
- Specification for appropriate wiring to the connector, including definition of pin functions, and specification for wire gauge.
- Mounting and installation instructions, including dimensions, and the following words, or equivalent:
- Wiring to or from this device, which enters or leaves the system enclosure, must utilize wiring methods suitable for Class I, Division 2 (or Division 1) Hazardous Locations, as appropriate for the installation.

| Certificate: | 2615594 | Master Contract: | 218481 |
| :--- | :--- | :--- | :--- |
| Project: | 2631365 | Date Issued: | June 10, 2013 |
|  |  |  |  |

- Enclosure Environmental ratings are achieved when conduit entries are torqued to at least 90.4 Nm ( 800 $\mathrm{lbs} / \mathrm{inch}$ ) and fasteners (Class A2-50) to 40 Nm ( $354 \mathrm{lbs} /$ inch) not-lubricated conditions.
- Above warning statements pertaining to Class I Divisions 1, respectively Class I Division 2 Hazardous Locations

Note - Jurisdictions in Canada may require these markings to also be provided in French language. It is the responsibility of the manufacturer to provide bilingual marking, where applicable, in accordance with the requirements of the Provincial Regulatory Authorities. It is the responsibility of the manufacturer to determine this requirement and have bilingual wording added to the "Markings".
